***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:
  - With regard to claims 1, 13, and 28; as the closest reference, Luo et al (US 6,414,817) shows a disk drive including: a disk clamp/spacer/flange attached to the hub in mechanical communication with the disk surface, the disk clamp/spacer/ flange including: an inner annular surface disposed adjacent the hub; an outer annular surface disposed concentrically about the inner annular surface; and a disk clamp/spacer/flange land portion disposed between the inner and outer annular surfaces and extending from the inner and outer annular surfaces to adjacent the disk surface; damping member disposed adjacent and in mechanical communication with the disk clamp/spacer/flange and the disk surface for damping movement of the disk relative to the hub; **but fails to show** an annular disk clamp/spacer/flange shim disposed between the damping member and the disk surface and between the disk clamp/spacer/flange land portion and the disk surface.
  - Applicant asserts that utilization of the disk clamp shim has the advantage of mitigating problems associated with the disk clamp damping member being directly disposed upon the disk surface and adhering to the disk surface (Specification, p. 17, lines 16-18).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
